

## Science and water fun Activity

EYFS: ELG: Stimulating the senses help to develop language where children learn vocabulary e.g. description of the material they are interacting with.

### You are your child's teacher:

Face to face play time

Use descriptive language:  
bubbles, pop, big bubbles,  
lots of bubbles.

Encourage other family  
members to join in with the  
activity by making pat-  
terns. Repeat activities as  
much as possible.

Be warm, supportive, and  
encouraging.

You will need:

- A bowl
- A whisk
- Water
- Tear free shampoo

Pour water and tear– free– shampoo into a bowl and encourage, your child to mix the two so-  
lutions together using a whisk. Let your child see the results as the bubbles start to appear, let  
them have time to understand that their actions have created a result.

Messy play using corn flour and water, or yogurt and jelly.

Try adding different size spoons or a biscuit as this may turn into a  
snack.

Adult supervision.
