What is Home Care?

Home Care is a service that delivers personalised assistance to individuals in their own homes, enabling them to preserve their independence and enjoy a better quality of life for longer in their own environment.

If you're happy living at home, able to do so safely, but require some additional support, home care may be the solution for you.

Lidder Care offers a variety of support ranging from medication assistance and companionship to night care, household tasks, meal preparation, errands and shopping assistance.

Our services also include live-in care, personal care, companionship care and respite care.

Home Care enables individuals to improve their quality of life, whilst receiving pivotal care and support with day-to-day tasks. This enables you to maintain your independence whilst receiving dignified, tailored care.

We believe that care should focus on choice, which is why all our care plans are bespoke and designed to meet the individual needs of each client.

Our carers are fully trained, DBS checked and undergo comprehensive inductions to ensure safety and high-quality care. We prioritise hiring compassionate individuals dedicated to helping and supporting others.
