Nottinghamshire Hospice

Our Care
Hospice in Your Home

We'll care for you and support you, allowing your carer, friends or family to take a break. We provide compassionate, person-centred care to patients with serious, incurable illnesses. We aim to:

- Improve quality of life
- Manage symptoms
- Promote dignity and comfort
- Provide emotional and social support to both patients and their carers.
- Support dying at home as the patient's preferred place of death

We offer a combination of shorter visits in the day and longer overnight visits. Due to high demand, our service is not always guaranteed but we do provide a roaming on-call service for unplanned visits between the hours of 10pm and 7am.

Nottinghamshire Hospice

What to expect when we visit

We know that having someone new coming into your home can be a daunting experience. All our staff wear a uniform and clean sensible shoes and will always carry an identity badge.

If a member of staff is coming for an extended period, we will phone you in advance to introduce the service, to check you are expecting our visit and to check if there are any special arrangements for access and parking.

Our staff member will need a comfortable chair to sit on plus a lamp or light at night and access to the kettle and toilet. You do not need to provide food for them. Our staff expect to work in a smoke-free environment.

Contact us now to get a referral - no need to wait for a doctor!
