Church Farm at Cotgrave

FOR LIVING WITH DEMENTIA

We pride ourselves on ensuring that people live in well-being, in a 'family' focused household. Staff behave as best friends and create a relaxed and homely feel to the day with people busy with familiar domestic aspects to life and things that interest them personally.

Welcome to Church Farm at Cotgrave

We are situated in the centre of a busy village, just a stroll away from the church, post office, coffee shop and pub so a trip out into familiar places is easily enjoyed. Our two enclosed gardens provide opportunities for people to enjoy the outdoors with great ease.

Meaningful daily living

Our two enclosed gardens provide opportunities for people to enjoy the outdoors with great ease. We keep busy in the garden with hanging out the washing and sweeping the paths and sit and enjoy the greenery and flowers.

People living and working together are occupied with every day life including baking, vegetable peeling, planting flowers and art and craft activities. We have regular visits from the chiropodist and the hairdresser visits weekly.

Mealtimes: a social part of the day

Mealtimes are a social part of the day and are never rushed. You may find people washing the pots, peeling vegetables ready for dinner, setting the table and talking about favourite recipes. Everyone is offered visual choices of what to eat and drink. We provide a varied menu selection each week to ensure people living with us receive balanced nutrition and our menus change with the seasons.

Living at Cotgrave

Living at Church Farm at Cotgrave, people share their lives with a family of people living and working together. There are three households, each feels familiar and is designed to reflect the needs and support the lifestyles of the people living there. Lifelong occupations continue in people's daily life.

People's own bedrooms provide private space personal to them, enhanced with their own belongings and creating a feeling of familiarity and safety that is truly their own. Easy access to enclosed gardens provides a sense of freedom and independence for people as they freely take a walk outside; sit and chat on a bench and join in outdoor domestic activity.

People's own bedrooms provide private space personal to them, enhanced with their own belongings and creating a feeling of familiarity and safety that is truly their own.
