

It's time to GO!

Are you still active and love a walk with the dog, meeting friends for a coffee or a visit to town? But you're starting to worry about falling, are anxious about being out on your own, or you've been in the house for so long, the outside world feels daunting?

At Nottingham on Call, we understand. And that's why we are now offering our customers the GO! It's a mobile care alarm that you can wear, or attach to your keys. It helps you to call for help, wherever you are, whatever time of the day or night. And all of this comes at the touch of a button.

You can use the GO! wherever you are in the UK. All calls will be answered by our friendly local team. If you have a non-medical emergency, we have a local response service for those who are located within 30 minutes drive from our Nottingham office.

INTERESTED? Read more overleaf about the fantastic features of the GO! and why it could be perfect for you, or a member of your family.

The GO! has been designed to give peace of mind and reassurance to you, your family and friends, whether you're in the house, or out and about.

FEATURES OF THE GO!

- **TWO-WAY SPEECH** – this means you can speak and listen to our call centre wherever you are. As soon as you press your alarm, it will ring through to one of our local advisers. You will be able to hear them, and they will hear you.
- **FALLS DETECTION** – this will automatically raise an alert with the call centre if you have a hard fall. An operator will try to talk to you once they receive an alert, to check you are ok. If they don't hear your response, they will immediately send help.
- **GPS LOCATION** – the call centre will know where you are if you are not able to tell them. The tracker that is built into your alarm means we can tell a family member or friend where you are, if they are nearby. Alternatively, our unique local response service can send someone out to help you. In the event of a medical emergency, we can send an ambulance to your location.
- **1-2 MONTHS BATTERY LIFE** – this is dependent on usage, but you will get a warning when the battery is low - with up to two days battery life left. You can then use the simple wireless charger provided.
